

Rely on our material competence for your demanding chemical processes

Pumping and mixing specialist for the chemical process industry

Proven expertise

With the long practical experience and full-scale test facilities Sulzer gives you access to:

- Increased hydraulic excellence
- Unique application coverage
- Experience in managing a diversity of process liquids and application environments
- The widest product portfolio available

Value you can count on

- Customized solutions
- New solutions for your future applications
- Energy-efficient products with low lifecycle costs and a lighter environmental footprint

Material competence

- We are the specialist in corrosive and erosive applications, thanks to our leading material technology
- We offer a wide range of materials for demanding chemical applications including SMO, titanium, zirconium, nickel, etc.
- Continuous research on new material options

Fertilizers

- Phosphate fertilizers
- Potash fertilizers
- NPK fertilizers

Acids

- Sulfuric, phosphoric, nitric and boric acids
- Acetic, lactic, formic, citric and oxalic acids

Chemicals

- Industrial chemicals and gas
- Dyes and pigments
- Plastics and synthetic rubber
- Synthetic fibres

Extensive product coverage

Through a wide portfolio, we bring you innovative pumping, mixing and agitation solutions and services for the chemical process industry, also including energy-efficient products for industrial water treatment applications. Advanced materials and a wide range of shaft seals and sealing systems combined with overall operating efficiency ensure a reliable process and long service life.

ISO and ANSI process pumps

Specialty pumps

Vertical pumps

API 610 pumps

Agitators, submersible pumps, mixers and compressors
